

## **OWENSBORO'S BROADBAND INFRASTRUCTURE**

The availability of reliable broadband in Owensboro is second to none and there are a variety of service providers available to meet your broadband demands. Owensboro is unique to many communities in that it has a [municipally owned](#) and operated fiber optic, as well as wireless, network. T-1 fiber connection speeds are up to 1.5 Mbps or you may chose point to point access with speeds up to 100 Mbps. Cable and DSL service is also available with speeds up to 5.0 Mbps.

Owensboro/Daviess County is also a partner in the [Connect GRADD](#) project. This ambitious and award-winning project will provide wireless high speed internet access to the seven county region surrounding and including Daviess County for a total coverage of over 2,600 square miles. This project is currently under construction and is slated to be completed in 2008.
